Planes (Yogas) explained:

No out of 8 important planes are complete inside your birth chart, which is not very good. These are: Success Plane, Practical Plane and above all the Golden Plane. Your Silver Plane, Thought plane, Action Plane, Mental and Emotional plane are also not complete and this weakens your thought process to think out of the box. Your incomplete planes are signaling that you will earn with hard work. You have less faith in your intuition; if you have a premonition about something you ignore it. There is no chance of you being selfish. If need be, you will apply your knowledge, imagination, thinking prowess, and creativity to get things done. Whatever fields you work in, you will not go deep into the things.

Dear, you are not an action oriented person and do not have a quick approach. You think much but do not take the necessary steps to implement your ideas. This affects your decision making ability. This is why, many opportunities will slip away from your hands. Your Emotional Plane indicates that you prefer your mind over your heart. That's a good thing nowadays.

॥Om Siddhashrimannmahaganadhipatiye Namah:॥

Repeating numbers explained:

Number 3 is repeating 2 times in your chart. You will gain an incredible knowledge. But communication abilities are poor. Still you are an outspoken individual. But you are not capable to use your communication skills effectively. You are a good beginner but bad finisher. Because of your high imagination power, sometimes you feel crazy. You enjoy breaching the traditional rules and established norms of the society.

Personal year'24: PY= 3 Jupiter, the Guru of your Driver's number

This is the year of Devguru Jupiter. This year your mind may be thinking of fun activities, but they are unlikely to happen. This year is asking you to focus on things related to education, knowledge, and religion/spirituality. This is also a year of expansion. The seed that you have sown in the last two-three years is now moving towards becoming a tree. This year you can successfully expand the power of education, career, family, friends, business, home, planning, travel, socializing, creativity, imagination, thinking and knowledge. Being the year of Devguru for you, it will give great results in works related to religion, education, spirituality, yoga, meditation, saadhana, tapasya, teaching, training, coaching, healing, training etc.

Remedies to enhance the year: Apply turmeric or saffron tilak on the forehead every day and taste a little saffron. On Thursday, feed soaked gram daal mixed with jaggery to a cow with your own hands.

Personal Months: D/1, C/9

October'24: 4 with struggling input (Slow, struggle and obstacles but not that bad, gives success in sales and marketing, IT, CCTV and computer related jobs)

Remedies: On Saturdays and Tuesdays, feed roti crumbs to stray dogs and crows as many times as possible. Donate electronic items and toys to children, old people on Saturdays or Tuesdays. If possible, go out and offer tea to handicapped/sick people.

॥Om Siddhashrimannmahaganadhipatiye Namah:॥

Light a ghee lamp in front of you and chant this Beej Mantra 108 times on Saturday evening: ॥Om Bhram BHreem BHraum sah raahavai namah ॥

November'24: 5 with strong input (extremely good)

Remedies: Always keep a green handkerchief in your pocket. Feed green grass/spinach to a cow on Wednesdays.

December'24: 6 with opposite input (medium results, health concerns)

Remedies: On Fridays, repeatedly donate/feed white items to poor/beggars/needly people- like flour, paneer, rasgulla, sugar, white clothes etc. Often on Fridays, offer homemade white kheer (puddings) to the disabled, especially the blind.

Light a ghee lamp in front of you and chant this Beej Mantra 108 times on Friday morning: ॥Om DRaam DReem DRaum Sah Shukraay Namah ॥

Personal year'25: PY= 4 Rahu with a very negative input

This is the year of Rahu, which demands hard work and a focused approach. And also instructs to do so. It is telling you that if you set a specific goal at the beginning of the year, and work hard towards achieving it, then by the end of the year you will have a lot to show to yourself and the world. Your pocket will be filled with achievements. But if you do not set any specific goal and sit idle, then the tone of this year can be serious, harsh and scary for you. So this can prove to be both the best and the worst year for you. It will test your weak Sun, mess with weak Mars and provoke you to commit mistakes again and again, create obstacles in the path of success, and create health related problems. But if you are careful and move ahead cautiously, then this year will strengthen the roots of your desired work. Remember, this year you should not take the fast track in any field otherwise you will suffer mental distress.

(According to your convenience and wish, the results of every month of the year 2025, its advantages and disadvantages, do's and don'ts and necessary and effective remedies will be told to you at the beginning of next year.)
