The D & C combination is favorable. The outcome will be positive. But the LOSHU GRID is too weak. That means the grid is not able to support the D and C adequately. This slows down the progress/success and gives mix results throughout the life. The luck factor is totally missing but the father remains the strongest pillar of his life. The SUN is his main source of inspiration, energy and power. He should always make happy and pray to the Sun. the Sun will keep his life energetic, happy and successful. All the other planets are either missing or underperforming.

Since the driver number is 7, the native considers everybody as a friend. He often over trusts people. Number 7 is the lord of disappointments also. That's why it is advised him not to trust each and every person easily. The trust deficit will always be there and can harm him badly. This includes career, money, relation, health related trust. He should always be calculative. Never trust even your close relatives.

He should avoid permanent partnerships in business. If he indulges in partnerships he will face setbacks, cheating and frauds. If he goes for some business he should operate it alone. In partnership

ventures he will lose money and may sink deeply in debt. Any kind of hacking will harm him. The most favorable business/job for him will be- Medicine (liquid based), Occult, Temples, Religion related work. Jobs are preferable over business for him. He is advised to stay away from the stock and commodity markets.

This year is governed by the Saturn for him. It makes almost a goon like relationship with his DOB. But number 7 will perform a need based friendly role with the year. That means it's a good year to start/indulge in occult related practices/activities.
